

In a unique oasis, **Moa** was founded for the purpose of being a home for a culture of peace: inner peace of each individual, peace between a man and his fellow brother, between deferent segments, races and cultures in our society, between nations and most of all between the humane race and the natural living environment.

Through ecological and holistic vision, built with local earth bricks and an architectural approach of simplicity and sustainability, all those in order to provide a base for workshops, conferences and gatherings in the magical ambiance of the desert.

Moa is surrounded by a vast ancient untouched desert, located along the ancient Nabatean incense route, between the legend city of Petra towards the seaport of the Mediterranean in an area recently declared as a world heritage site.
